ABSTRACT

Project Title:

Shoporeal – User Registration and Shopping Platform

Overview: **Shoporeal** is an initial prototype of a web application designed for a user-friendly online shopping experience. Developed using HTML, CSS, and JavaScript, the project currently focuses on implementing a secure and responsive user registration interface, which captures key user details such as name, email, password, mobile number, date of birth, gender, and address.

Key Features:

- Built using **HTML, CSS**, and **JavaScript**
- Clean and intuitive registration form
- Designed for seamless user interaction and experience
- Vision to support shopping across various sectors like:
  - Kitchen appliances
  - Electronic devices
  - Bedroom essentials etc..,.

Future Scope:

This prototype lays the groundwork for a complete e-commerce platform. Planned enhancements include:

- Adding login functionality
- Showing products (like electronics, kitchen appliances, etc.)
- Adding a shopping cart
- Allowing secure payments

Note: While the name "Shoporeal" may reflect inspiration from leading platforms, this project is an original work developed for learning and demonstration purpose
